1. Introduction

Overview Of MUBAS and The Problem Solution

The Malawi University of Business and Applied Sciences (MUBAS) is one of the best higher education institutions in Malawi it was established in 1963 under the university of Malawi as a technical college and it was then renamed to MUBAS after the university of Malawi system was restructured which is also involved in research activities that are funded by the government, international donors, and development partners. Just like many higher education facilities in developing nations, MUBAS faces several challenges in managing its post-award activities efficiently while maintaining compliance with the stringent donor requirements.

The post Award Grant Management System is designed to be a tailor-made system for mubas, and its task is to transform how mubas administer research grants after funding has been awarded. The comprehensive digital solution aims to automate and streamline the grant administration process, enhance transparency, and ensure compliance with funder regulations and

Problem Statement: Post-Award Grant Management in Academic institutions
